Education

Leipzig University

Oct 2021–Jul 2026

Bachelor of Science in Computer Science | Final grade: 2.6

Leipzig, Germany

Selected coursework: Parallel Processing, Distributed Application Development, Information Retrieval, Knowledge-Based Systems, and Database Systems

Experience

adesso SE

Leipzig, Germany

Working Student, Software Engineering

Nov 2023–Present

- Developed an internal web shop and its product logic with Next.js, TypeScript, and Spring Boot; implemented LLM-powered features and internal automation.
- Designed a Local-First shopping cart with intelligent product search and optimized performance and user interactions.
- Containerized the frontend, backend, and supporting services to create reproducible development and consistent runtime environments.
- Contributed to the internal AI taskforce by evaluating and introducing AI tools for developer productivity and internal workflows.

Technologies: TypeScript, Next.js, React, Java, Spring Boot, Docker, LLM applications

vub | Wissen mit System

Leipzig, Germany

Data Management Team Lead

Oct 2022–Nov 2023

- Led a student data management team responsible for most internal data systems.
- Improved scalable data pipelines and internal tools to automate recurring processes.
- Worked entirely in English within an international student team and coordinated with cross-site colleagues in India to maintain data quality and reliable workflows.

Focus: Data pipelines, internal data systems, process automation, team coordination

Working Student, Software Engineering

Jun 2022–Oct 2022

- Developed backend functionality for the company's core enterprise knowledge management system.
- Implemented features and resolved defects in Java, Spring Boot, and JEE, with occasional contributions to the React frontend.

Technologies: Java, Spring Boot, JEE, JBoss, EJB, JDBC, Maven, Git, React

Project

Microservice Architecture Visualization

2025–Jul 2026

Bachelor's thesis project | Grade: 1.0

- Developed an application for visualizing microservice architectures and communication patterns that is used in projects at adesso.
- Designed and conducted a two-phase study to evaluate the application, guide its practical development, and improve usability.

Technologies: Java, Maven, React

Technical Skills

Programming

Java, TypeScript, Go, C

Frontend & Backend

Spring Boot, JEE, React, Next.js, Node.js, REST APIs

Databases

PostgreSQL, MySQL, MongoDB, SQL/NoSQL

Tooling

Git, Docker, Maven, Gradle, Linux, Neovim

AI/ML

LLM applications, RAG, prompt engineering, classical ML methods

Languages

German: Native

English: C1 (professional working proficiency)
